**Additional General Comments:**

Natural light is good / be Belleville: lake, environment context, warmth / too many libraries compete with intent of contents, too much light can make reading difficult when trying to focus eyes against light, study the effect of light inside / liked the use of curved surfaces within rather than rectangular spaces. The building itself can be functional & easy to build, but the interior can be "curvy" for not much money. Likewise, interior color can be relatively inexpensive. Please try to put wood into the interior! / Most were way too fancy & not anything like what we would need. We need to be sure to not use too many windows which are not energy efficient. / generally liked interiors better than exteriors. People seemed to like rural settings - appropriate to Belleville (heard comments with library that looks like barn. Liked warmth of wood materials - not just metal or white space. Comment - Brain overload too many choices / Van Buren Main: nautical theme, lakeside, waves & curves, windows, nature. Sumpter satellite: rural theme (Ohio barn library). Kids section-train depot theme. Outdoor usage, close parking, stone, fireplace, library location on lake will give it presence, indoor garden atrium protected by glass wall, checkout desk-reference desks clearly defined (currently confusing), don't want to see location of buildings in middle of nowhere. We like close proximity to run errands, to ride bikes, etc. / My comments in summary: I like modern: lead the community forward rather than reflect the past. Glass & stone, open rooms flowing into one another, use nature in & outside views, use our lake setting, use science theme (knowledge), large fireplace centered so sit & walk around, soft carpet. / There were about 1/3 slides not appropriate for this program - Program Workshop Agenda: "A", Slide Presentation: "B-" / Must be warm & cozy with little or no excesses. Just to get a millage has taken us from the 80's. Nice workshop /
